

Section 24(c) Special Local Need Label

FOR DISTRIBUTION AND USE ONLY WITHIN ARIZONA

ProClipse 65 WDG

EPA Reg. No. 228-434
EPA SLN No. AZ-080015

FOR CONTROL OF CERTAIN WEEDS ON DRAINAGE DITCHES

Active Ingredient:

Prodiamine (CAS No. 29091-21-1) 65.0%

Other Ingredients: 35.0%

Total: 100.0%

KEEP OUT OF REACH OF CHILDREN

CAUTION

FAILURE TO FOLLOW THE DIRECTIONS FOR USE AND PRECAUTIONS ON THIS LABEL MAY RESULT IN POOR PEST CONTROL, CROP INJURY, OR ILLEGAL RESIDUES.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

All applicable directions, restrictions and precautions on the EPA registered label are to be followed.

This label must be in the possession of the user at the time of application.

Weeds Controlled

When used as directed in this label, this product is approved for control of the following weeds:

- | | |
|--------------------------|---------------------------------|
| Barnyardgrass | Panicum (Texas, Fall, Browntop) |
| Johnsongrass (from seed) | Sprangletop |
| Witchgrass | |

Irrigation, Drainage Ditches, Spreading Grounds, Channels, Canals and Similar Sites

Apply 1.0 to 2.3 pounds of product per acre for preemergent control of shallow germinating annual grasses. This product inhibits growth and development of newly germinated weed seeds. It will not control established vegetation. Higher rates of application provide for a longer control period. Sequential applications are allowed so long as the total amount of product applied does not exceed the maximum annual application of 2.3 pounds per acre. Apply only when water is not present. For irrigation ditches, apply when ditch is not in use. To minimize movement of this product with irrigation water and to activate product, it is essential that the herbicide be fixed in the soil by moisture. Apply before expected seasonal rainfall (if possible when soil in the ditch is still moist). Following treatment, if rainfall has not totaled at least one-half inch within 14 to 21 days, fill ditch with water and allow to stand for 48 hours; drain off any remaining water before using ditch.

Wastewater Treatment Facilities (Levees)

Apply 1.0 to 2.3 pounds of product per acre for preemergent control of shallow germinating annual grasses. Use the higher rate of application for longer control periods. Sequential applications are allowed so long as the total amount of product applied does not exceed the maximum annual application of 2.3 pounds per acre. Applications may be made down to the water level. Do not apply to the water. Care must be taken not to allow overspray of the water or drift into the water.
